Lab 13: Mitigating Security Vulnerabilities

In this lab, you will apply the techniques you've learned to improve a vulnerable Web application.

Objectives:

- To apply mitigation techniques

Part 1: Mitigating SQL Injection and XSS

Steps:

_1. As you have in earlier labs, import the **{Lab Installation Directory/starters/lab13/lab13.zip** existing project into your workspace.

_2. Carefully examine the application and then run *index.jsp* on the server and observe its functionality.

_3. This application is vulnerable to both XSS and SQL injection attacks. Your job in this part is to study the application, find the vulnerabilities and then fix them.
